

1. Identify the Requirements of Your System

Purpose:

To build a multi-user eCommerce platform for vendors and buyers with essential store management, product browsing, cart, checkout, and review features.

User Roles:

- **Buyers**
 - Register & login
 - Browse products and stores
 - Add items to a cart
 - Checkout and receive an invoice via email
 - Leave product reviews (verified or unverified)
- **Vendors**
 - Register & login
 - Create one or more stores
 - Add, edit, or delete products
 - View reviews left by buyers
- **Admin (Django Superuser)**
 - Full access via Django admin interface
 - Manage all users, stores, products, and reviews
